EDUCATION

Oct 2024 – present Cottbus, Germany	MS in Artificial Intelligence <i>Brandenburgische Technische Universität Cottbus-Senftenberg</i>
Nov 2020 – May 2024 Hyderabad, India	B.Tech in Computer Science and Engineering - Data Science CGPA: 8.96 <i>Guru Nanak Institutions Technical Campus</i>

PROFESSIONAL EXPERIENCE

Apr 2025 – Present Berlin, Germany	Working Student <i>50Hertz Transmission GmbH</i>  • Providing critical market intelligence through ad-hoc data requests and developing data visualizations, enabling my team to make faster, data-driven decisions. • Driving the integration of new AI frameworks and contributing to the team by initiating the development of AI Chatbots. • Further, I would be working on core Python-based Analytics Suite for European electricity market data, utilizing statistical modeling and data engineering to provide actionable insights for System and Market Operations.
Jan 2024 – Apr 2024 Remote	Data Science Intern <i>MakeRoot</i>  • Developed financial reporting tools using Python and SQL, enhancing tracking and analysis capabilities for educational institutions. • Led the design of advanced data visualization features for an enquiry management system, improving data management and institutional understanding. • Worked on Tableau for in-depth data analysis, contributing to a 20% increase in user engagement by enabling data-driven decisions.
Aug 2023 – Dec 2023 Hyderabad, India	Associate Engineer <i>IK TECHNOLOGIES</i>  • Implemented Azure DevOps pipelines, improving the software delivery process through enhanced CI/CD practices as part of a .NET development team. • Developed and maintained sophisticated data management systems using Microsoft SQL Server, which improved data handling operations and increased overall data retrieval efficiency by 50%. • Contributed to the design and development of robust APIs, facilitating better integration and functionality across platforms.

PROJECTS

Intelligent Knowledge Retrieval System using RAG and LLMs

Intelligent Knowledge Retrieval System using RAG and LLMs

- Developed a Retrieval-Augmented Generation (RAG) pipeline integrated with a Large Language Model (LLM) to efficiently process and retrieve precise information from a large, specialized knowledge base.
- Built the complete Python-based system to significantly improve the accuracy and speed of information lookup, showcasing expertise in modern GenAI application development and natural language processing.

Advanced Anomaly Detection in Meteorology Using k-NN and Autoencoders

Statistical Deep Learning

- Developed predictive models utilizing k-NN and autoencoders to identify unusual weather patterns, enhancing early warning systems for meteorological anomalies.
- The models give early signs that help people make better plans for disasters caused by bad weather.

College ERP

Python & Django

- Developed a comprehensive College ERP system utilizing HTML, Django, CSS, and Python, streamlining academic and administrative management.
- The system improved data accessibility and reliability, increasing educational institutions' operational efficiency by over 30% and significantly reducing processing times for academic tasks.

Sentimental Analysis on Women Clothing Reviews

Natural Language Processing

- Developed a machine learning model in Python to do sentiment analysis on reviews of women's clothing. This model successfully classifies emotions and polarities to determine customer satisfaction.

Real-Time Chat Site

Firebase & Firestore

- Developed a secure, real-time chat site that provides instant communication capabilities, built using HTML, JavaScript, and the serverless architecture of Firebase & Firestore.

SKILLS

Data Science

Python, SQL, R Programming, Machine Learning, TensorFlow, Deep Learning, .NET ,Power BI, Tableau

Web Development

HTML, CSS, JavaScript, Django, ReactJS, NodeJS, REST APIs, WordPress, MongoDB

Cloud Technologies

AWS, Google Cloud Platform, Azure SQL Database, Compute Engine, Firebase

Development Tools

GitHub, Microsoft SQL Server Management Studio, Oracle DBMS, Git, Jupyter, RStudio, VS Code

ORGANIZATIONS

Nov 2023 – Aug 2024

IEEE Student Branch

Technical Head & Research Scholar

- Facilitated collaborations with research experts and academic professionals, boosting the branch's research activities and leading to increased student publications in well-known journals and conference proceedings.
- Organized impactful research events and led hands-on technical workshops, encouraging a community of innovation and improving members' expertise in cutting-edge technologies.

Jul 2022 – Aug 2023

Google DSC

Android Facilitator

- Led Android app development sessions, enhancing students' programming skills from basic to advanced levels through practical projects.
- Cultivated a community of programmers by providing ongoing support, tools, and collaborative opportunities for innovative app development.

Mar 2022 – Dec 2023

Feliks Club

Tech Community Manager

- Organized events and tech talks that united technology enthusiasts to explore AI and machine learning, enhancing community skills and industry insights.
- Enhanced community interaction by implementing collaborative projects and tech talks, which improved members' technical abilities and industry knowledge.
